

A REALLY BIG TRIKE!!!

Do you know what a tricycle is? Who rides tricycles?

Children ride trikes before they learn to ride a two-wheel bike. How funny would it be if your dad or mom tried to ride a little tricycle?

Did you know that sometimes trikes are for adults? Sometimes adults can't drive a car or even walk. They need some other way to go to work and the store. Do you know anyone who can't walk on their own? Who helps them?

In a faraway country called Nepal, our friends from Baptist Global Response are helping people who can't drive or even walk by building big tricycles to help them get around.

One of the people they helped is a man named Uraj (oo-RAJ). Uraj can't walk because he was very sick as a child. If he needs to go someplace, friends have to help him. Sometimes he has to crawl on the ground to go places. That makes Uraj very sad.

Churches like ours gave money to Baptist Global Response so a big tricycle could be made for Uraj. Now he can go places and earn money all on his own. Now Uraj is happy because people like us helped him get the tricycle. Uraj knows how much God loves him because we cared enough to help him.

PRAYER CORNER

Let's pray and thank God for loving us and Uraj. Let's pray that our friends from Baptist Global Response can share the good news of God's love with more people like Uraj.

VIDEO

You can watch or download a video about the tricycle project at <http://vimeo.com/35278431>. This video is for general audiences and not specifically for children.
